

Drenamin®

3650 & 3700

Please Copy for Your Patients

Drenamin is a Special Combination Formula That Supplies a Wide Variety of Nutrients Derived From its Principal Ingredients of Vacuum Dried Bovine Adrenal and Bovine Adrenal PMG™ Extract

The adrenal glands are involved in a number of physiological functions in the body. They are involved in pulmonary function, blood sugar metabolism, carbohydrate metabolism, central nervous system processes, cardiovascular function, hematological metabolism, hormone production, gastrointestinal function, and liver function. The adrenal glands play an important role in helping the body respond appropriately to changes caused by stress and different emotions.†

How Drenamin Keeps You Healthy

Supports healthy adrenal gland function

Drenamin was formulated to help maintain the healthy functioning of the adrenal glands by supplying bovine adrenal tissue proteins and bovine adrenal PMG™ extract. These organ tissue proteins provide nutritional "stimulative" support to the corresponding organs in humans, while supplying nutrients such as vitamin and mineral complexes. In addition, the adrenal tissue proteins contain valuable trace elements and amino acids.†

Helps to maintain cellular health

Protomorphogen™ is the brand name of Standard Process' extracts that are derived from nucleoprotein-mineral molecules. Protomorphogen™ extracts are the concentrated components of the cell nucleus that are responsible for determining the cellular function of the adrenal glands. The antigenic properties of these nucleoprotein-mineral molecules promote healthy cellular division, growth, repair, and function. Almost all body systems are influenced in some way by the action of adrenal glands.†

Provides sources of vitamins and minerals

Carrots and carrot juice have been used traditionally for centuries as sources of nutrients, such as beta carotene (a vitamin A complex precursor), vitamin C, thiamine, riboflavin, niacin, pantothenic acid, vitamin B₆, folate, and minerals, such as calcium, iron, magnesium, phosphorus, potassium, sodium, zinc, copper, manganese, and selenium. They also contain amino acids.†

Enhances circulation

Buckwheat provides the vitamin P complex (rutin), quercetin, and other naturally-occurring bioflavonoids. The vitamin P complex contains compounds to help maintain healthy circulation and capillaries, and it works to keep cell membranes permeable so that cells can better accept and exchange nutrients. Rutin, a family member of quercetin, is an antioxidant and free radical scavenger.†

Supports metabolic efficiency

Soybean lecithin helps support a variety of basic metabolic functions and structures by virtue of its contents. Soybean lecithin is a phospholipid, a phosphorus-containing fat with choline. Choline is essential in normal fat transport and carbohydrate metabolism.†

Drenamin®

How Drenamin Keeps You Healthy (continued)

Supports adrenal gland function

The vitamin E complex has been shown to support the endocrine system. Vitamin E affects the structure and healthy function of the adrenal gland. The most biologically-active forms of vitamin E are found in wheat germ.†

What Makes Drenamin Unique

Unique Product Attributes

Multiple nutrients from a variety of plant and animal sources

- Provides adrenal support from bovine glands
- Extracts from bovine and porcine tissues provide nutrients and support to the corresponding tissues in humans
- Vitamins, minerals, and nutrients from plants and animal tissues work synergistically for maximum effect†

Contains Protomorphogen™ extracts

- Standard Process' unique manufacturing method of deriving tissue cell determinants from animal glands and organs
- Help provide cellular support and rehabilitation in corresponding human tissues
- Important antigenic properties of nucleoprotein-mineral determinants, the foundation of the product†

Certified Organic Farming

A healthy ecosystem is created by using organic farming techniques, such as rotating crops, fertilizing the soil with nutrient-rich cover crops and by-products from our processing, practicing strict weed control standards, and continually monitoring the health of our plants

- Assures the soil is laden with minerals and nutrients
- Ensures plants are nutritionally complete and free from synthetic pesticides

Unique Processing

Upon harvesting, nutrient-rich plants are immediately washed and promptly processed

- Preserves nutritional integrity

Exclusive low-temperature, high-vacuum drying technique

- Preserves the enzymatic vitality and nutritional potential of ingredients

Not disassociated into isolated components

- The nutrients in Drenamin are processed to remain intact, complete nutritional compounds

Degreed microbiologists and chemists in our on-site laboratories constantly conduct bacterial and analytical tests on raw materials, product batches, and finished products

- Ensures consistent quality and safety

Vitamin and mineral analyses validate product content and specifications

- Assures high-quality essential nutrients are delivered

Whole Food Philosophy

Dr. Lee challenged common scientific beliefs by choosing a holistic approach of providing nutrients through whole foods. His goal was to provide nutrients as they are found in nature—in a whole food state where he believed their natural potency and efficacy would be realized. Dr. Lee believed that when nutrients remain intact and are not split from their natural associated synergists—known and unknown—bioactivity is markedly enhanced over synthetic nutrients. Following this philosophy, even a small amount of a whole food concentrate will offer enhanced nutritional support, compared to a synthetic or fractionated vitamin. Therefore, one should examine the source of nutrients rather than looking at the quantities of individual nutrients on product labels.

Three tablets supply 50 mg bovine adrenal and 40 mg bovine adrenal PMG™ extract.

Proprietary Blend: Defatted wheat (germ), nutritional yeast, bovine liver, bovine adrenal, porcine stomach, bovine adrenal PMG™ extract, choline bitartrate, oat flour, dried buckwheat (leaf) juice, buckwheat (seed), alfalfa flour, magnesium citrate, mushroom, bovine bone, allantoin, porcine brain, carrot (root), soybean lecithin, veal bone, peanut (bran), and mixed tocopherols (soy).

Other Ingredients: Honey, calcium lactate, cellulose, water, niacinamide, potassium para-aminobenzoate, ascorbic acid, calcium stearate, riboflavin, and pyridoxine hydrochloride.

Suggested Use: Three tablets per meal, or as directed.

Sold to health care professionals.

Studies on nutrients generally use large doses and these studies, some of which are cited below, are the basis for much of the information we provide you in this publication about whole food ingredients. See the supplement facts for Drenamin®.
